

## COMPACT UTILITY TRAILERS

Perfect for any season, Precision's **Compact Utility** trailers bring you to the fun. From weekend getaways to full-fledged vacations, from snowmobiles to quads, these trailers can handle everything you put on them.

Underneath, the 3,500 lb axles and 15" radial tires ensure that these units can manage highways or back roads and keep on rolling. If adventure and leisure is what you want, these trailers will get you there and back quickly and safely. These models come with a 4' spring-assisted rear-loading ramp with 4' ramps that slide in to become part of the sides.

### STANDARD FEATURES

- Lippert Axles
- Voltflex Wiring Harness
- 2x10 Douglas Fir Decking (Treated)
- HD Stackepockets and Rubrail
- LED Lights
- Driver Side Step
- 12k Sidewind Jackwith Dropleg
- 16" O/C Crossmembers
- Heavy Duty Fender Guards

### PREMIUM OPTIONS

- [Backup Lights in Back Bumper](#)
- [Custom Paint Jobs](#)
- [Electric / Hydraulic Brakes](#)
- [Rubberized Reflex Stone Guard](#)
- [Choose from 10-12-14 Ply Tires](#)
- [Deep Toolbox with Lid in Neck](#)
- [Receiver Hitch in Back Bumper](#)
- [Winch Mount with Receiver Tube](#)

## GENERAL DUTY TRAILERS

Perfect for any season, Precision's **General Duty** trailers are built lighter then the Heavy Duty Equipment models but are built to last. Designed for guys that don't use a trailer every day and don't require a heavy trailer.

Precision works to satisfy the needs of their customers by offering both heavy duty and more affordable lighter duty models. These trailers will get you there and back quickly, efficiently and safely.

### STANDARD FEATURES

- Lippert Axles
- Voltflex Wiring Harness
- 2x10 Douglas Fir Decking (Treated)
- HD Stackepockets and Rubrail
- LED Lights
- Driver Side Step
- 12k Sidewind Jack with Dropleg
- 16" O/C Crossmembers
- Heavy Duty Fender Guards

## HEAVY DUTY EQUIPMENT TRAILERS

Precision Trailers' **Heavy Duty Equipment** bumper pull series offers models from various sizes and options – from the common flat deck with slide in ramps, to the dovetail with standup ramps, to our hassle-free spring assisted mini beavertail flip down ramps.

These trailers are built for Canada's extreme climate and to last in the toughest terrain, providing you with a high-quality tubular steel frame and 3" - 16" O/C high tensile i-beam cross members for increased strength and durability. The hitch tubing is doubled up for extra strength and a deeper a-frame toolbox. This trailer series, like all our trailers, uses Voltflex wiring harnesses that are fully sealed off inside the tubular frame. From Dexter's more durable Torsion Suspension to the smoother slipper spring suspensions, Carlisle wheels and radial tires are selected for each model. This trailer is a must for any construction worker.

## HEAVY DUTY TILTING DECK TRAILERS

The Precision Trailers **Heavy Duty Tilting Deck** offers models of various sizes – from the partial 60/40, to the full tilting deck running either electric over hydraulic power packs, or a free flowing valve controlled cylinder.

The tilting deck series provides the same high quality tubular steel frame and 3" 16" O/C and high tensile i-beam crossmembers for increased strength and durability. This trailer, like all Precision trailers, uses Voltflex wiring entirely sealed off inside the tubular frame.

The trailer combines Dexter's more durable torsion suspension and smoother slipper spring suspensions, Carlisle wheels and radial tires are specifically selected for each model. Offering a one-side locking and unlocking system, the tilting deck allows for smooth transition from the ground to the deck for those hard to load items. This trailer is a must for any construction worker.

## DECK ABOVE TRAILERS

Precision Trailers' **Deck Above** bumper pull series delivers durability and reliability. From general farm use to hotshot or long haul trucking, the bumper pull series trailers are available in a wide range of models to match your range of loads.

The bumper hitch makes for convenient hookups and easy pulling, either across the field or down the highway. These models let the transporter load and unload equipment or cargo from the side, without the need to worry about banging up fenders.

Precision's Deck Above series come with heavy duty 7' slide in ramps that clean up in the back bumper with a lockable lid. Our wiring is well-protected inside our tubing trailer frame. All models come with stake pockets with continuous rub rail and under deck tie down rails for added protection and load security.

## STANDARD FEATURES

- Lippert Axles
- Voltflex Wiring Harness
- 2x10 Douglas Fir Decking (Treated)

## BUMPER PULL TRAILERS

With Precision, you get a dump trailer engineered to work and designed to do more. The Scissor hoist lift system is job sized and engineered for positive lifting and cleanout.

The Precision **Bumper Pull** dump trailer includes a range of models, all designed to meet your specific needs. All models come with slide-in ramps to make these trailers ideal for loading and hauling your equipment. They also store conveniently under the trailer when not in use. The three-way tailgate features a rear double door and spreader gate with ramps hook-ups, which allows fast unloading of your materials, or a more controlled spread if you prefer.

## STANDARD FEATURES

- Lippert Axles
- Voltflex Wiring Harness
- LED Lights
- Driver Side Step
- A-Frame Toolbox
- 16" O/C Crossmembers
- Stakepockets on Side for Side Extensions
- 3 Way Tailgate
- Nordic Sissor Hoist
- Bucher Double Acting Power
- Pack 3/16 Thick Floor
- 1/8 Thick Sides
- Heavy Duty 1/8 Fenders

## PREMIUM OPTIONS

# BEAVERTAIL RAMP TRAILERS

Precision Trailers' gooseneck series deliver durability and reliability. For general farm use to hotshot or long haul trucking, the gooseneck series trailers are available in a range of models to match your range of loads.

The gooseneck hitch makes for smooth, easy pulling, either across the field or down the highway. The gooseneck series trailers (like all Precision trailers) uses Voltflex wiring harnesses on most models, which are soldered, then heat shrunk. All of our wiring is well protected inside our tubing trailer frame. The cable is further protected by rubber hose when passing through any holes in the framing, providing extensive protection to the trailer's wiring system.

All models come with features such as stake pockets with continuous rub rail and under deck tie down rails for added protection and load security.

## TILTING DECK TRAILERS

Precision Trailers' gooseneck **Tilting Deck** delivers durability and reliability, without the worry of lifting ramps. They make loading or unloading a breeze.

From general farm use to hotshot or long haul trucking, the gooseneck tilt series trailers are available in a range of models to match your range of loads. The gooseneck hitch makes for smooth, easy pulling, either across the field or down the highway.

The gooseneck tilt series trailer uses Nordic Scissor hoists powered by Bucher Hydraulics' double acting power pack. Our tubing trailer frame protects all our wiring. The cable is further protected by rubber hoses when passing through any holes in the framing. This provides extensive protection to the trailer's wiring system.

All models come with features such as stake pockets with continuous rub rail and under deck tie down rails for added protection and load security.

## STANDARD FEATURES

- Uniquely Designed and Engineered Gooseneck
- Dexter Axles
- Voltflex Wiring Harness
- 2x10 Douglas Fir Decking (Treated)
- HD Stackepockets and Rubrail
